B1

1. (Amended) An elastomeric laminate, comprising:
a. an elastomeric film including at least one of the group consisting of multi-block elastomeric copolymers, polyurethanes, polyamides, and metallocene-catalyzed polyolefins, the film having a first major surface and a second major surface; and
b. a strand of an elastomeric material secured to the first major surface of the elastomeric film.

A2

15. (Amended) The elastomeric laminate according to Claim 1, wherein:
at least two different portions of the elastomeric film exhibit amounts of elastic tension that differ from one another.

16. (Amended) The elastomeric laminate according to Claim 15, further comprising a plurality of elastomeric strands on the first major surface of the film, wherein at least two of the elastomeric strands exhibit amounts of elastic tension that differ from one another.

17. (Amended) The elastomeric laminate according to Claim 1, comprising multiple elastomeric strands on the elastomeric film surface.

Sub
B1

18. (Amended) The elastomeric laminate according to Claim 17, wherein:
at least two of the elastomeric strands exhibit amounts of elastic tension that differ from one another.

19. (Amended) The elastomeric laminate according to Claim 17, wherein:
at least two of the elastomeric strands have thicknesses that differ from one another.

A2
Contd

20. (Amended) The elastomeric laminate according to Claim 17,
wherein:
at least two of the elastomeric strands have compositions that differ
from one another.

A3
Sub B1

24. (Amended) The elastomeric laminate according to Claim 23,
wherein:
at least two of the groups exhibit different amounts of elastic tension
from each other.

A4

28. (Amended) An elastomeric laminate, comprising:
a. an elastomeric film including at least one of the group consisting of
multi-block elastomeric copolymers, polyurethanes, polyamides, and metallocene-
catalyzed polyolefins, the film having a first major surface and a second major
surface;
b. a plurality of strands of an elastomeric polymer material secured to
the first major surface of the elastomeric film; and
c. a facing sheet bonded to at least one of the elastomeric film and the
elastomeric strands.
